TIGERLOGIC CORPORATION UNVEILS YOLINK 1.0 DEVELOPER BETA FOR GOOGLE CHROME BROWSER, WITH GOOGLE DOCS INTEGRATION

SAN JOSE, Calif., Dec. 9, 2009 /PRNewswire-FirstCall/ --TigerLogic Corporation (Nasdaq: TIGR) today announced the release of yolink 1.0 developer beta, a unique research tool for the Google Chrome™ browser. Yolink allows consumers to interact with 'digital search' on a whole new level of depth, accuracy, and immediacy.

Yolink gives users the ability to quickly view detailed information that is hidden 'one-level deep' behind search results or the links of any web site, and in e-books and text. As such, yolink augments, rather than competes, with traditional search engines. After a quick scan, yolink displays extracts containing your key search terms and provides a one-click method to take you directly to the information located on the particular web page. Once found, information can be easily exported to Google Docs™ with a single click.

“Along with our recently introduced integration with Google Docs, we are extremely excited to offer yolink to the 30+ million users in the Google Chrome community,” said Brian Cheek, Director of Business Development at TigerLogic. “By providing a seamless bridge from search to creation of documents and spreadsheets, yolink provides a powerful application tool for use in many research and business scenarios.”

Yolink 1.0 developer beta for Google Chrome is designed to optimize search experience:

- **Quick Find:** Yolink searches within links and text for keywords in context, reducing the need for additional tabs and windows.
- **Single-Click Access:** Clickable preview extracts with highlighted keywords for instant contextual information.
- **Simple Save and Share:** Single-click integration with Google Docs.

The yolink team will be participating at the Add-on-Con conference at the Computer History Museum in Mountain View, CA on Friday, December 11, 2009.

Google Chrome users can now download yolink 1.0 developer beta for free directly from the Google Chrome extension gallery at <https://chrome.google.com/extensions> or at <http://www.yolink.com>.

About TigerLogic Corporation:

TigerLogic Corporation (Nasdaq: TIGR), has been providing reliable data management and rapid application deployment solutions for ISVs and developers of database applications for more than three decades. TigerLogic's product offerings include: 1) TigerLogic® yolink, an internet browser-based

application that enhances the search experience of any popular search engine or Web page; 2) TigerLogic® XML Data Management Server (XDMS) provides flexible, scalable and extensible XML data storage as well as query and retrieval of critical business data across a variety of structured and unstructured information sources; 3) Pick® Universal Data Model (Pick UDM) based database management systems and components, including D3®, mvEnterprise® and mvBase® that are the choice of more than a thousand application developers worldwide; and 4) Omnis Studio®, a cross-platform, object-oriented RAD tool for developing sophisticated thick-client, Web-client or ultra thin-client database applications. TigerLogic's installed customer base includes more than 500,000 active users representing more than 20,000 customer sites worldwide, with a significant base of diverse vertical applications. With employees and contractors worldwide, TigerLogic offers 24x7 customer support services and maintains an international presence. More information about TigerLogic and its products can be found at <http://www.tigerlogic.com>. Product details about yolink can be found at <http://www.yolink.com>.

Except for the historical statements contained herein, the foregoing release may contain forward-looking information. Any forward-looking statements are subject to risks and uncertainties, and actual results could differ materially due to several factors, including but not limited to the success of the Company's research and development efforts to develop new products and to penetrate new markets, the market acceptance of the Company's new products and updates, technical risks related to such products and updates, the Company's ability to maintain market share for its existing products, the availability of adequate liquidity and other risks and uncertainties. Please consult the various reports and documents filed by the Company with the U.S. Securities and Exchange Commission, including but not limited to the Company's most recent reports on Form 10-K and Form 10-Q for factors potentially affecting the Company's future financial results. All forward-looking statements are made as of the date hereof and the Company disclaims any responsibility to update or revise any forward-looking statement provided in this news release. The Company's results for the quarter ended September 30, 2009 are not necessarily indicative of the Company's operating results for any future periods.
